Professional Summary

Senior Android Developer with **5+ years of professional experience** designing, developing, and maintaining high-performance Android applications using **Kotlin** and **Java**. Experienced in building scalable applications with **MVVM**, **Clean Architecture**, **Coroutines**, **Flow**, **Hilt**, **Room**, **Retrofit**, **RESTful APIs**, and **Firebase**. Strong background in integrating **Google AdMob** with **Mediation** and **Bidding** to maximize app monetization. Successfully developed and published **20+ Android applications** on the Google Play Store across sports, utilities, productivity, and privacy categories. Experienced in the complete Android development lifecycle, including UI/UX implementation, performance optimization, debugging and ongoing maintenance. Also contributed to a production application with **10M+ downloads**, focusing on feature development, bug fixing, and performance improvements.

Currently seeking a **Senior Android Developer** opportunity where I can contribute to building high-quality mobile applications, collaborate with talented teams, and continue growing with modern Android technologies.
